

Launching the calculator:

Open calculator.html in any of your favorite browsers. After entering the numerical expression either click on 'Calculate' button or press 'Enter key'.

Using the Keypad:

To display the Keypad toggle the button next to 'Keypad'.

Functionality:

The application supports evaluation of numerical expressions (Addition, Subtraction, Multiplication and Division). Parenthesis is not supported and is treated as an invalid operator. The application does not use JavaScript eval() function for its computation.
